

THAT'S WHO WE ARE

The APEX Group with its headquarters in Rostock-Laage is one of the pioneers of climate-neutral energy supply and a driver of the global energy transition with its innovative solutions. APEX Group employees focus on project engineering, planning, funding and construction as well as operation of customized hydrogen energy solutions accomplishing great things every day to drive our innovative strength. To make green energy available to all of us at any time and any place in a reliable and CO2-neutral way, we need a strong and committed team. That's why we're looking for experts to support our team with their know-how in the continuous development of our products. We look Forward to hearing from you!

MEP-PLANNER HYDROGEN PLANT ENGINEERING (M/F/D) – FULL-TIME

Starting: from now

Your tasks

- Conceptual design of hydrogen plants
- Independent assumption of planning tasks
- Participation in projects for customers from the industry, private investors and the public authorities
- Technical contact person in the project team and at the client
- Integral evaluation of specialized planning
- Working in an interdisciplinary holistic planning team
- Responsibility for your projects and topics

Your profile

- Successfully completed studies in supply engineering (TGA), building services engineering or Facility Management or an equivalent qualification in the field of technical building equipment, e.g. state-certified technician in the field of HLS
- Ideally, several years of professional experience in planning, consulting and supervision of building services installations
- Knowledge of specific technical regulations
- Proficient handling of MS Office
- Experience with tendering and planning programs such as Build-Up as well as knowledge of CAD and Autodesk-Revit (desirable)
- Ability to work in a team and solution-oriented
- Fast comprehension combined with analytical and networked thinking
- Good feeling for people and issues

We offer

- Pioneer work in the growing future market of hydrogen
- Permanent employment
- Cooperation in a committed and open-minded team
- Friendly working environment with well-defined areas of responsibility and scope for individual development opportunities in the company
- Opportunity to help in shaping the development of the company
- Subsidy for the company pension scheme or company health insurance, capital-forming benefits
- International working environment
- Quick decision processes
